Battlefield: Bad Company 2 Game Servers

New vehicles like the All Terrain Vehicle (ATV) and the UH-60 transport helicopter allow for all-new multiplayer tactics in the warzone, extensive fine-tuning ensures that this will be the most realistic vehicle combat experience to date.

Tactical destruction is taken to new heights with the updated DICE 'Frostbite' engine. Players can now take down entire buildings or create their own vantage points by blasting holes through cover, thereby delivering a unique dynamic experience in every match.

Players can also compete in 4-player teams in 2 exclusive squad-only game modes, fighting together to unlock exclusive team awards and achievements. Spawn on your squad to get straight into the action, and use gadgets such as the tracer dart in-conjunction with the RPG to devastating effect.

Excellence in the battlefield is rewarded with an extensive range of pins, insignias and stars to unlock along with 50 dedicated ranks to achieve.

Variety also extends into the range of customizable kits weapons and vehicles available. With 4 distinct character classes, and weapons, gadgets and specializations players have over 15000 kit variations to discover and master players will be able to fine-tune their preferred fighting style to give them the edge in combat.

All of these features combine to deliver spectacular and unpredictable action moments found nowhere else in a modern warfare experience.

As with all our game servers, a Bad Company 2 game server from Multiplay is chock full of freebies and extras, giving you more bang for your buck!
